ORBITAL

Our planet's water

Salt
water

97%

The oceans hold about 97%
of all Earth's water.

Frozen water

2%

About 2% of Earth's water is frozen and
locked up in glaciers, ice caps and permafrost.

Fresh water

<1%

Less than 1% is actually fresh water,
what we want to use in our daily
lives.

The problem

We are taking fresh water for granted.

150 litres

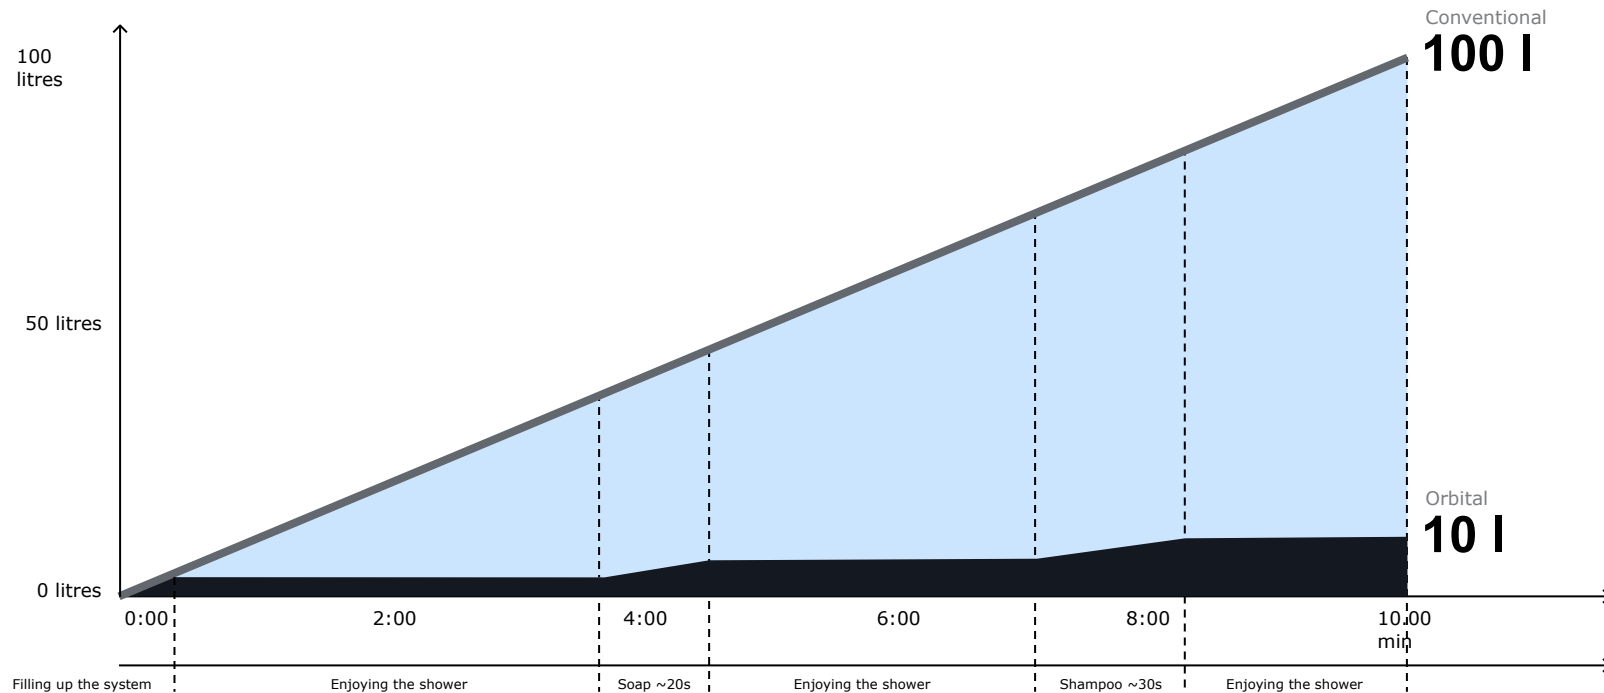

Average water usage in the Nordics per person/day

France, August 2022

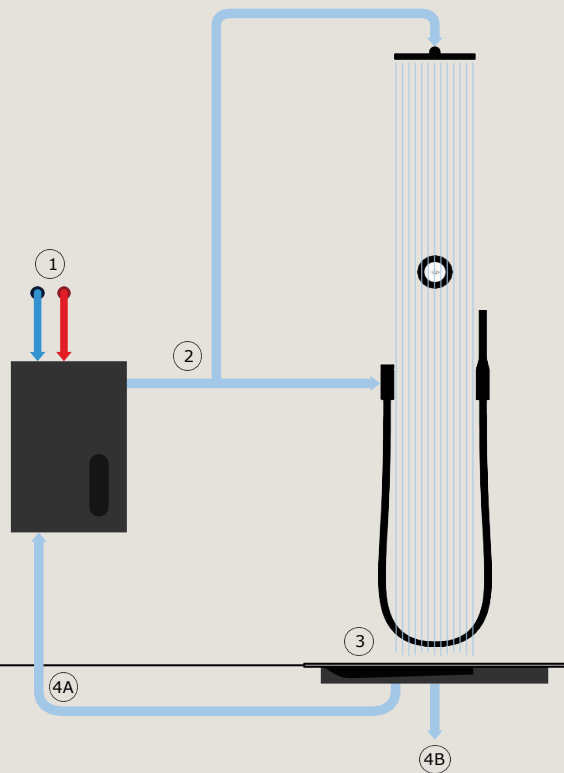

Water usage shower

Conventional Shower
Orbital

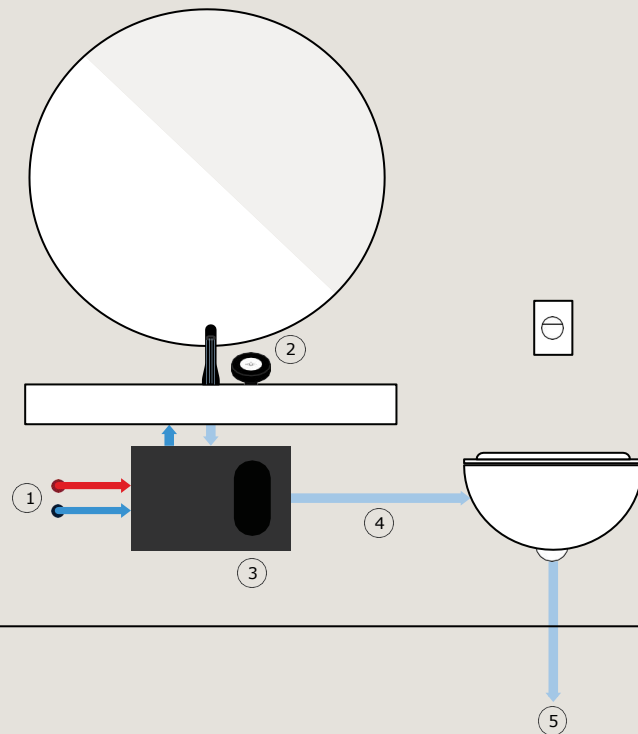

How it works

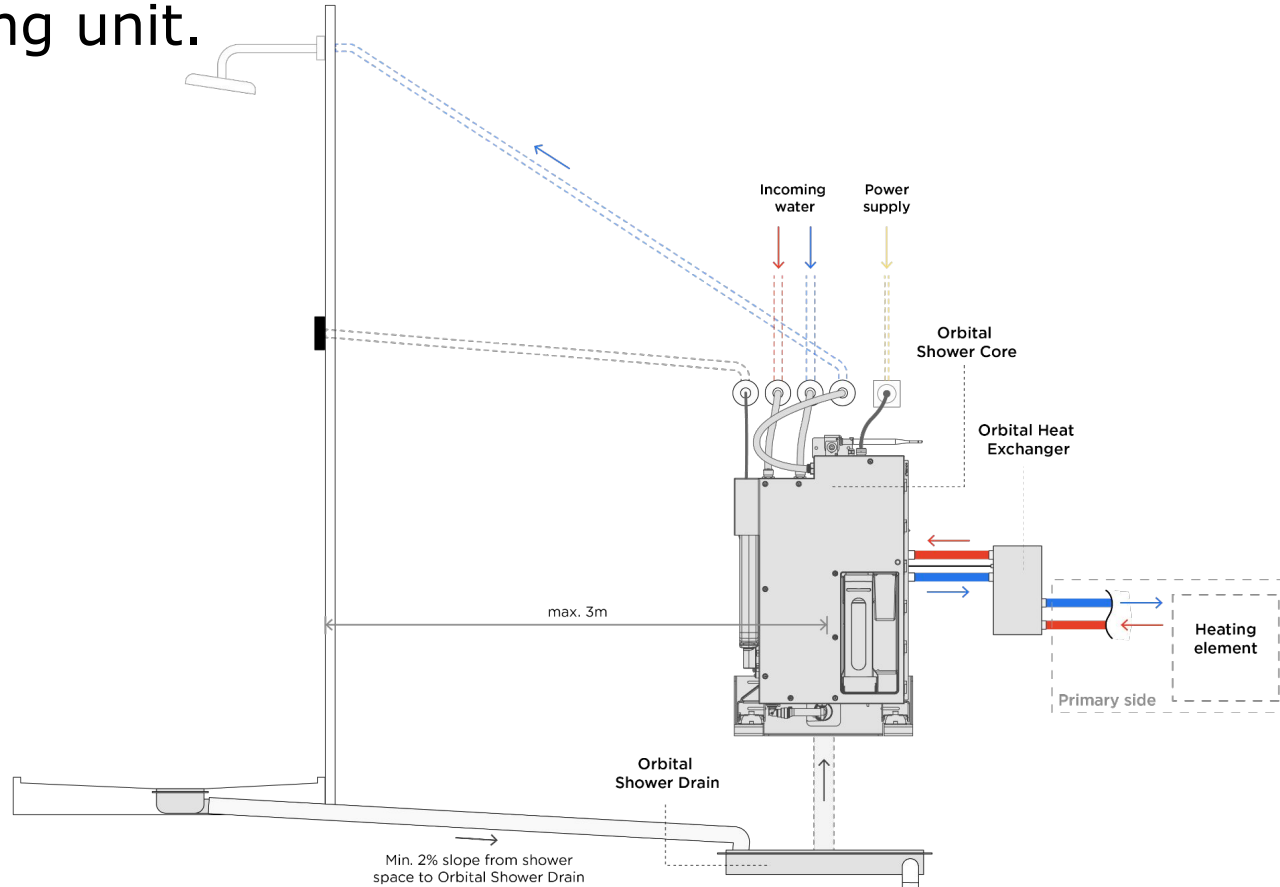

Orbital Shower

Orbital Tap

Real time control of shower temperature with heat exchanger as heating unit.

Examples of Thesis

Proposals:

- Water surface tracking using a waveguide.
- Categorize shower contaminations with machine learning.
- Categorize individual's shower pa with machine learning.
- Real time state estimation of a sl installation.
